# ***Silence Inspired by Nature***

# THE AERATRON DIFFERENCE

Designed in Australia for Australia by a Swiss-German engineering team and assembled by hand in a state of the art manufacturing facility in Taiwan.

AeroDC's range of choice rated fans includes the worlds most energy-efficient and silent DC ceiling fan designed in Australia by a Swiss-German Engineered team.

Aeratron ceiling fans are the greener, healthier alternative to air conditioning for air movement. Engineered to be seen but not heard, Aeratron fans utilises the body's own natural cooling system and won't dry your skin and eyes like air conditioning.

QUALITY  
Matters

NATURE  
Knows Best

TECHNOLOGY  
Has No Limits

# QUALITY

At the end of the day, a good product means nothing unless you use the finest materials to build it, and that's exactly what we do, down to the last screw. We work to the highest "Swiss engineering" standards to ensure top quality, long-lasting fans.

# NATURE

Our fans' blades are actually wings... We picked the world's most efficient and quiet birds as inspiration and designed our fans to look and function similarly (that's why we have those signature winglets at the tips of our blades). We optimized and tested until we found the perfect airflow experience - one that you cannot hear (but can definitely feel).

# TECHNOLOGY

With a winning design in hand, we then turned to technology to help minimize fan noise and improve efficiency. We added a unique Self-Balancing System to prevent the fan from wobbling and were able to reduce energy consumption of the fans by a further 50%.

# AERATRON

It's in the air
